

ORDER #00000

ITEM 110

RETAIL TRIM LEVEL

Pantone Solid Coated Colors

Scale 1cm = 1"

Production will not start until we have approval. Lead times start once your order is paid in full.

This design is not proportioned to the final apparel sizes and there may be some variation size to size. This design file is to show basic jacket layout, colors, placement of graphics, logos and other elements. All logos will be scaled to fit each apparel size unless specified logo sizes are called out in this design.

Any graphics, logos and other elements crossing over any seams will not line up 100%.

Colors may vary from size to size and product to product. Design file must be in **RGB** format unless you need color matching; then use **PMS solid coated color codes**. If PMS colors are not specified, we will match colors as closely as we can to "our" computer screen colors.

Any Bitmap images or Photoshop elements must be in **RGB format**.

For black, use **RGB code 000**; otherwise your black may look grey.

If you are doing your own design we can not guarantee the outcome of the final product.

Also, you need to provide your design in 3 file types:

- 1. Original design file format.**
- 2. PDF file.**
- 3. JPEG file at 300 dpi.**
